### Technical Data

A very quick drying and easy sanding acid catalyst lacquer designed for manual or automatic spray application.

### Properties

Formulated to provide outstanding resistance to abrasion, wet and dry heat, spirit solutions and a wide range of household chemicals. Meets the requirements of FIRA Std 6250 - Horizontal Surfaces (excluding kitchen worktops), Severe use. Lacquers of this type achieve their full resistance properties after 21 - 28 days drying, although careful use is possible before this period.

### Mixing Guidelines

Catalyse 9 parts lacquer to 1 part 5CAT/200 by volume and mix well prior to use. The catalysed lacquer should ready for use (RFU) but can be thinned up to 5% by volume with the recommended thinner, 2007/900, if required. Under normal conditions these products will have a workable pot-life of 36 hours after catalysis.

### Typical Handling

- **Touch Dry:** 15-20 mins @ 18°C
- **Sandable:** 1 hour @ 18°C – Use 320 or finer silicone carbide paper.
- **Recoatable:** 1.5 hours @ 18°C
- **Packing time:** Overnight minimum, dependent on conditions.

### Cleaning

2007/100 should be used for equipment cleaning.

### Coverage

Approximately 40m² per 5Lts dependent upon the size, orientation and surface quality of the item being coated.

### Tinting

Use Morrells Light Fast Stains up to a maximum of 5% (after catalysis).

### System Guidelines

Morrells recommends the following guidance for use of this product range:

**Typical Finish:**
2-3 coats at 75g/m² per coat (Dry Film Thickness ~ 31μ per coat) applied coat-on-coat.

Using these products in systems outside these guidelines can lead to immediate and latent problems with the integrity of the finish.
## Important Information
- Designed for spray application.
- Under catalysing or over catalysing can cause impairment of cure and cracking.
- Excessive coating weights can lead to cracking or lifting.
- Leave adequate time between coats. Do not apply more than 3 coats in one day. Denib between coats to aid adhesion.
- Do not overcoat with 1K or 2K Polyurethane (PU) products.
- Morrells do not recommend the mixing of catalysed material with fresh material. Always catalyse the right amount for the job.
- Use only the recommended thinner. Use of non-recommended thinner can cause uneven/patchy drying.
- Do not use over pigmented bases or with NC, Shellac or Precatalysed Sealers.
- Some timbers (e.g., cherry, maple etc.) are prone to discoloration or reddening when using acid catalyst lacquers.
- Users should prepare a test panel prior to commencement and satisfy themselves that the specific system provides the appearance and level of performance appropriate for the end-use.
- Douse all waste materials associated with this/these materials with water before disposal and avoid prolonged/excessive exposure to heat.
- Store all waste materials in secure metal container outside, away from combustible materials overnight.
- Product should be stored above 5°C and protected from frost.
- Optimum application is achieved between 18°C and 22°C with good air movement and ventilation.
- Finished products should not be subjected to environments with temperatures of < 2°C.
- Out of scope with 2004/42/EC.

### SECTION 4: FIRST AID MEASURES

#### 4.1. Description of first aid measures

**Inhalation.**

Move the exposed person to fresh air at once. Perform artificial respiration if breathing has stopped. If respiratory problems, artificial respiration/oxygen. Keep the affected person warm and at rest. Get prompt medical attention.

**Ingestion**

NEVER MAKE AN UNCONSCIOUS PERSON VOMIT OR DRINK FLUIDS! Remove victim immediately from source of exposure. Immediately rinse mouth and provide fresh air. Promptly get affected person to drink large volumes of water to dilute the swallowed chemical. Get medical attention.

**Skin Contact**

Use appropriate hand lotion to prevent defatting and cracking of skin. Remove affected person from source of contamination. Wash off promptly and flush contaminated skin with water. Promptly remove clothing if soaked through and flush skin with water. Get medical attention promptly if symptoms occur after washing.

**Eye Contact**

Make sure to remove any contact lenses from the eyes before rinsing. Promptly wash eyes with plenty of water while lifting the eye lids. Continue to rinse for at least 15 minutes and get medical attention.

#### 4.2. Most important symptoms and effects, both acute and delayed
4.3. Indication of any immediate medical attention and special treatment needed

Unusual Fire & Explosion Hazards
Fire causes formation of toxic gases.

Specific Hazards
The product is flammable, and heating may generate vapours which may form explosive vapour/air mixtures.

5.3. Advice for firefighters

Special Fire Fighting Procedures
Use pressurised air mask if product is involved in a fire. Cool containers exposed to flames with water until well after the fire is out.

Protective Measures In Fire
Self contained breathing apparatus and full protective clothing must be worn in case of fire.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures

Wear protective clothing as described in Section 8 of this safety data sheet.

6.2. Environmental precautions

Spillages or uncontrolled discharges into watercourses must be IMMEDIATELY alerted to the Environmental Agency or other appropriate regulatory body. Ensure that waste and contaminated materials are collected and removed from the work area as soon as possible in a suitably labelled container.

6.3. Methods and material for containment and cleaning up

Keep combustibles away from spilled material. Absorb in vermiculite, dry sand or earth and place into containers. Wash contaminated area with water. Wash thoroughly after dealing with a spillage.

6.4. Reference to other sections

SECTION 7: HANDLING AND STORAGE

7.1. Precautions for safe handling

Keep away from heat, sparks and open flame. Do not use contact lenses. Avoid spilling, skin and eye contact. Eye wash facilities and emergency shower must be available when handling this product. During application and drying, solvent vapours will be emitted.

7.2. Conditions for safe storage, including any incompatibilities

Store in tightly closed original container in a dry and cool place. Store under well-ventilated conditions at a temperature below 25°C.

Storage Class
Flammable liquid storage.
