**SECTION 4: FIRST AID MEASURES**

**4.1 Description of first aid measures**

**General advice:** First aid responders should use the recommended protective clothing. Refer to Section 8 for specific personal protective equipment.

**Inhalation:** Move affected person to fresh air. If breathing has stopped, administer CPR. If the person vomits, clean airway and turn head to side to prevent choking. If the person is unconscious but breathing, place stably on their left side in the recovery position. Seek immediate medical attention.

**Eye Contact:** Flush eyes gently with clean water for at least 15 minutes. If irritation persists, seek immediate medical attention.

**Skin Contact:** Remove any contaminated clothing using appropriate gloves. Rinse skin thoroughly for 15 minutes in a shower or with a hose. Seek immediate medical attention.

**Ingestion:** Rinse mouth out with water and remove any chemical residue. If person vomits, clean airway and turn head to the side to prevent choking. Do NOT induce vomiting and do NOT give anything to drink unless directed by a physician. If person is unconscious but breathing, place stably on their left side in the recovery position. Never give anything by mouth to an unconscious person. Seek immediate medical attention.

**4.2 Most important symptoms and effects, both acute and delayed**

Aside from the information found under the First Aid Measures (above) and special treatment needed (below), any additional important symptoms and effects are described in Section 11: Toxicological Information

**4.3 Indication of any immediate medical attention and special treatment needed**

**Notes to Physician:** Treat symptomatically. No specific antidote available.

**SECTION 5: FIREFIGHTING MEASURES**

**5.1 Extinguishing media**

Foam, carbon dioxide, dry chemical

**5.2 Special hazards arising from the substance/mixture**

Prevent run off from entering drains or sewers. Fires involving this product may release oxides of carbon and nitrogen, reactive hydrocarbons, and irritating vapors.

**5.3 Advice for firefighters**

Any closed containers may rupture when exposed to extreme heat. Use a water spray to cool containers. Solvent vapors are heavier than air and travel along the ground.

**SECTION 6: ACCIDENTAL RELEASE MEASURES**

**6.1 Personal precautions, protective equipment, and emergency procedures**

Immediately turn off or isolate any sources of ignition (pilot lights, electrical equipment, flames, heaters, etc.). Evacuate area and ventilate. Only trained and properly protected personnel should be involved in clean up procedures. Use appropriate safety equipment.

**6.2 Environmental precautions**

Do not allow substance to enter soil, ditches, sewers, waterways or groundwater. CAUTION: If spilled material is cleaned up using a regulated solvent, the resulting waste mixture will also be regulated.

**6.3 Methods and materials for containment and cleaning up**

Personnel wearing proper protective equipment should contain spill immediately with inert materials (sand, earth, chemical spill pads of cotton) by forming dikes. Dikes should be placed to contain spill in a manner that will prevent material from entering sewers and waterways. Large spills, once contained, may be picked up using explosion-proof, non-sparking vacuum pumps, shovels, or buckets, and disposed of in suitable containers. If a large spill occurs, notify the appropriate authorities. In case of spill or accident, contact CHEMTEL at +1.813.248.0585.

**6.4 Reference to other sections**

References to other sections, have been cited in previous subsections.

**SECTION 7: HANDLING AND STORAGE**

**7.1 Safe handling**

Open containers carefully and in a well-ventilated area, using appropriate respiratory protection. Wash hands thoroughly after handling. Keep containers closed when not in use. Do not transfer to unmarked containers. Empty containers may contain product residue which may exhibit hazardous properties; therefore, do not pressurise, cut, glaze, weld or use for any other purpose.

**7.2 Conditions for safe storage**

Store in a cool, dry, well-ventilated area. Keep containers tightly closed and store away from heat, sparks, open flame, or oxidising materials. Extended storage at excessive temperatures may produce odorous and toxic fumes from product decomposition.

**7.3 Specific end uses**

See technical data sheet on this product for further information.

**SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION**

**8.1 Control parameters**

**8.2 Exposure controls**

Avoid creating dust or mist. Local exhaust ventilation, process enclosures, or other engineering controls are required when handling or using this product to avoid overexposure. Use explosion-proof ventilation equipment. Do not use in closed and confined spaces. Keep all levels below exposure limits. Perform regular monitoring to ensure exposure limits are not exceeded.

**Personal Protective Equipment (PPE)**

**Eye/Face Protection:**

Use safety eyewear with splash guards and side shields. Use additional eye protection, such as chemical safety goggles when the possibility for eye contact from splashing, spraying liquid, or airborne material exists.

**Skin Protection:**

Avoid contact with this product. Wear appropriate protective gloves and clothing to prevent skin exposure. Use proper glove and clothing removal techniques to avoid skin contact with this product. When handling large quantities, eye wash stations and deluge showers should be available.

**Respiratory Protection:**

Do not breathe vapours. When concentrations exceed the established limits, wear an appropriate, properly fitted respiratory until vapours are exhausted. Use of an air-purifying or positive-pressure self-contained

breathing apparatus is recommended. For emergency situations, use a positive-pressure self-contained breathing apparatus.

**General Hygiene Measures:**

When using this product, do not eat or drink. Wash hands with soap and water before breaks and at the end of each workday. Avoid contact with contaminated clothing and protective clothing. Wash before reuse.
